Beautiful Foil Finish with No Dies:
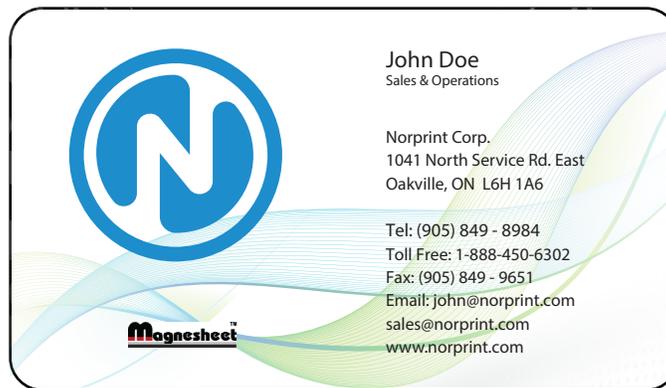

The process we use to apply Gold Foil, Silver Foil, and Holographic Patterns is *easy* and only requires for the designer to provide us with 2 artwork files:

Step 1: From your standard 4 CMYK colour artwork create a black only knock-out layer where the **Foil** is to be applied and save this artwork as **File 1**

Step 2: Subtract the knock-out layer you just created above from you original 4 CMYK artwork and save this new updated artwork without the knock-out layer as **File 2**

Step 3: Upload File1 & File 2 in pdf format with your order… we will take care of the rest !!!

Original File

FILE ①

FILE ②

** Logo will now have a rich Silver or Gold foil finish

Unlimited Metallic Colours Option: If you want a rich metallic finish then just provide us the original 4 CMYK artwork file (with all layers) and the black only knock-out **File 1**
   …The Black-knock out file will be overprinted with your full CMYK artwork turning this into an unlimited metallic colour finish work of art!!
